DETAILED ACTION

Acknowledgment

1. The amendment filed on 5/3/2005 has been entered.

Allowable Subject Matter

2. Claims 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the hybrid drive system as recited in claims 1 and 15-17, which include a short-time storage and a long-time storage device, wherein the short-time storage having a shorter power take-off time than the long-time storage. The power take-off time being the minimum time during which a certain fraction of a storage's nominal storage energy can be drawn from the storage. Wherein the short-time storage and the long-time storage are coupled by an electric valve such that, upon a supply of power to an electric machine during a boost operation. The electric machine is initially only supplied from the short-time storage rather than the long-time storage, thus resulting in a decrease of the voltage of the short-time storage, and that, when the boost operation requires so much energy that the voltage of the short-time storage equals or drops below the voltage of the long-time storage, the electric valve connects the short-time storage in parallel, thereby causing the subsequent supply of the electric machine during the boost operation to be made from both the short-time storage and the long-time storage, wherein the supply current from the long-time storage flows through the

electric valve. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
